

1st Workshop and Hands-on-Tutorial on UN/CEFACT's Modeling Methodology 2.0 (UMM 2)

at the 14th UN/CEFACT Forum Meeting, April 20-24 2009, Rome, Italy

Date & Location: Thursday, 23rd April 2009, 9:00 – 12:00

Workshop synopsis:

UN/CEFACT's Modeling Methodology (UMM) is a UML-based approach for capturing the business processes between organizations. UMM guides a business analyst from requirements elicitation to the design phase of an inter-organizational system. UMM is independent to the technology used to exchange the business documents. The workshop will introduce the new features of UMM 2.0 – which is currently in Implementation Verification.

During the workshop participants will learn the basic principles of UN/CEFACT's Modeling Methodology and examine its different features. A hands-on-tutorial session will give the participants the opportunity to create their own UMM model under the instructors' supervision.

Instructors:

Christian Huemer, Philipp Liegl, Thomas Motal, Rainer Schuster, Marco Zapletal
Vienna University of Technology, Austria

Materials needed

In principle no material is needed for the workshop. However, if you would like to participate in the hands-on-tutorial and create a UMM model on your own, you should bring your own laptop.

Software requirements:

- Enterprise Architect. (Free, 30 days trial version is available at <http://www.sparxsystems.com.au/>)
- VIENNA Add-In. An Add-In for Enterprise Architect supporting the development process of UN/CEFACT's Modeling Methodology. Available free of charge from <http://code.google.com/p/vienna-add-in/downloads/list>

Workshop fee: free of charge
